

(Continued from page 5)

safely and efficiently. In addition to building, maintaining, and operating the state highway system consisting of over 18,000 lane miles and 3,600 bridge structures, WSDOT is responsible for the largest ferry system in the nation; owns three Talgo train sets in the Amtrak Cascades fleet; and works in partnership with others to maintain and improve local roads, railroads and airports, as well as to support alternatives to driving, such as public transportation, bicycles and pedestrian programs. Additionally, WSDOT manages the world's widest tunneling project and the world's longest floating bridge. WSDOT's diverse programs and projects are supported by more than 6,800 full-time employees, including engineers, vessel captains, maintenance technicians, environmental specialists, planners, and more. We take pride in our workforce and strive for excellence and integrity in everything we do.

This position will perform the following work:

- xManage development of hydraulic designs for fish barrier projects.
 - xApply appropriate design methodologies based on Washington Department of Fish and Wildlife (WDFW) stream crossing guidelines, compose basis of design reports, and coordinate with WDFW and project design offices.
 - xProvide direction to Olympic Region design teams to ensure that all storm water/hydraulic related design and documentation are economical, practical and comply with applicable storm water/hydraulics regulations and standards.
 - xPerform engineering analysis in support of fish passage design, including stream simulation analysis, using the most current stream crossing guidelines and applicable computer modeling software.
 - xInvestigate project sites, including developed and undeveloped terrain, which may include traversing uneven or steep terrain, near heavy traffic.
- An ideal candidate for this position will have:
- xFour years' experience in the hydraulic field OR a combination of hydraulic experience and experience as a

Transportation Engineer or equivalent experience.

- xMust possess a valid Professional Engineering license in the State of Washington.
 - xBachelor's degree in Civil Engineering or related field.
 - xDemonstrated ability lead and direct design engineers.
 - xAbility to exercise sound judgment in directing, analyzing, and evaluating storm water design of highway facilities.
 - xAbility to perform stream simulation analysis using the appropriate modeling software.
 - xKnowledge of the WSDOT Highway Runoff Manual, Hydraulics Manual, and current environmental and hydraulic laws and regulations.
 - xHighway Runoff Manual Certification.
 - xExcellent communication skills in both the oral and written form, and the ability to communicate complex information with diverse audiences.
 - xProficient use of computers and engineering software.
 - xValid driver's license.
- How to Apply: Applications for this recruitment will be accepted electronically. To view the entire announcement and to apply, please visit www.wsdot.wa.gov or email to gieser@wsdot.wa.gov. Please reference recruitment number 2016-057.
- The Washington State Department of Transportation is an equal opportunity employer. Women, racial and ethnic minorities, persons of disability, persons over 40 years of age, and disabled and Vietnam era veterans are encouraged to apply. Persons with disabilities needing assistance in the application process, or those needing this job announcement in an alternative format may call the Office of Human Resources, at 360.705.7042 or email at jobinfo@wsdot.wa.gov

The Mission of 3 R U W O D Q G • V % X U H D
Development Services is to promote safety, livability, and economic vitality through efficient and collaborative application of building and development codes.

The Position:

Structural Engineers for the Bureau of Development Services (BDS) perform advanced professional engineering assignments. Work is completed by using individual creativity and initiative, while also collaborating and problem solving with team members on unusual or complex projects. The core of the work is performing specialized structural plan reviews of private development and public work structures. Typical projects to review include - but are not limited to building and non-building structures (both commercial and residential), foundations,

(Continued on page 7)

(Continued from page 6)

retaining walls and shoring, and cell towers. The review process assures compliance with applicable codes and regulations and professional standards of practice, with an end goal of meeting the needs of the community. BDS strives to provide all services in an equitable manner; demonstrated understanding and abilities in the areas of equity, inclusion, diversity and/or accessibility are preferred. The vacancy is in the Engineering Plan Review Section of the Bureau of Development Services.

Benefit Highlights:

- x Generous vacation and sick leave accrual benefits; holidays plus three personal holidays each year
- x Medical, dental, vision, life and long term disability dependent coverage (children, spouse or domestic partner)
- x Flexible Spending Accounts: Medical Expense Reimbursement Plan and Dependent Care Assistance Plan
- x City-paid retirement contributions; and an optional employee-paid Deferred Compensation Plan

It is the policy of the City of Portland that no person shall be discriminated against based on race, religion, color, sex, marital status, family status, national origin, age, mental or physical disability, protected veteran status, sexual orientation, gender identity or source of income. The City values diversity and encourages everyone

who is interested in employment with the City to apply

An Equal Opportunity/Affirmative Action Employer

Fluency in a second language is desirable, but not required. To learn more about this position and the qualifications, please join us for an optional Information Session (see below for details).

For questions about this position and the qualifications, contact Amit Kumar at Amit.Kumar@portlandoregon.gov (503) 237561.
